Summary

Lead Data Scientist with 5+ years of experience building scalable ML systems and leading high-impact data products. Proven track record of owning end-to-end ML pipelines, improving model performance, and driving business growth. Experienced in mentoring teams, stakeholder management, and deploying production-grade AI solutions at scale.

Summary

Lead Data Scientist with 5+ years of experience building and deploying large-scale ML systems and LLM applications. Experienced in technical leadership, NLP, search systems, and production AI serving 10M+ monthly requests.

Skills

Languages: Python, SQL

ML: Regression, Classification, Clustering, NLP, Feature Engineering

LLMs: Transformers, BERT, LangChain, Gemini API, Prompt Engineering, Fine-tuning, Evaluation

Data & Search: Elasticsearch, MongoDB, PostgreSQL, ETL

Tools: AWS, Docker, Git

Experience

Lead Data Scientist

Apr 2026 – Present

Perfios, Bangalore

- Own the roadmap and technical execution for the Address Intelligence platform serving **10M+ monthly requests**.
- Drive architecture across ML systems, LLM integrations, and production inference pipelines.
- Lead a cross-functional team of Data Scientists and Software Engineers, overseeing technical delivery and sprint execution.
- Partner with product and enterprise stakeholders to prioritize features and define ML solutions.
- Mentor and manage **2 engineers**, conducting technical reviews and performance evaluations.

Senior Data Scientist

Apr 2024 – Mar 2026

Perfios, Bangalore

- Designed and productionized an address matching platform serving **10M+ monthly requests**.
- Improved production traffic by **140%**, increased model accuracy by **53%**, and reduced inference latency by **4.5x**.
- Built a unified multi-LLM platform for document entity extraction.
- Developed ML models for address parsing, matching, and quality assessment for Indian addresses.

Data Science Software Engineer

Feb 2022 – Apr 2024

Perfios, Bangalore

- Transitioned address matching from rule-based systems to ML-driven solutions using annotated datasets.
- Migrated search infrastructure from MongoDB to Elasticsearch, improving query performance by **5x**.

Software Developer

Oct 2020 – Feb 2022

Microland, Bangalore

- Developed IAM solutions for multi-tenant cloud and on-premise infrastructure platforms.

Education

B.E. Computer Science, Birla Institute of Technology

2020

CGPA: 8.2/10

Projects

- **LLM-Based Text Extraction System:** Built a modular framework integrating multiple LLM providers for structured data extraction from unstructured documents.
- **Address Intelligence System:** Developed hybrid ML + rule-based system for address parsing, matching, and scoring.

Leadership & Activities

- Mentored junior data scientists and conducted internal knowledge-sharing sessions on ML system design.
- Led cross-team initiatives to improve model deployment and monitoring practices.
